

ACIDRENOL

Corrects the acid and intoxicated fields

Ref: 1016

NUT/PL/AS 944/17

Presentation : Box of 60 single dose packet of 3.3gr each.

Directions : Progressive course of treatment of 1 to 2 single dose packet per day :

- 1st week : ½ single dose packet twice a day
- 2nd week : 1 dose twice a day

For a better dissolution pour the powder in a small container with a top and shake vigorously... and it's ready!

Duration of treatment: 33 days to renew if needed after a one week break between 2 courses of treatment.

Do not use : The use of *Juniperus communis* must not be extended without a specialist's advice (max weeks). Do not use in case of renal insufficiency, during pregnancy and breast feeding. The control of the correction can be made by a control of the urinary acidity on the second morning's urine until you get a pH between 7 and 7.5 on a 10 days period.

ACIDRENOL is a food supplement destined to maintain and/or restore the acid-base balance, a very important physiological parameter governing the optimal functioning of many biological and enzymatic functions. The progressive acidification process very often finds its origin in alimentary mistakes (overtaking of digestive capacity, excess of acidifying protein, insufficient intake of fruit and vegetables source of alkalinizing minerals (the most important being potassium). It follows a cellular clogging which translate into a progressive acidification of the organism.

The correction of an acid-base field requires a rational care :

1. adoption of a reasoned lifestyle
2. regular physical activity (elimination of CO₂ and cell oxygenation)
3. acid drainage with phyto-nutrient elements
4. support of the hepatic extraction metabolism
5. support of the intestinal barrier
6. support of the energetic metabolism promoting the eliminations

Acidrenol participates to the support of acid-drainage, to the hepatic extraction metabolism and to the support of the intestinal barrier and of the energetic metabolism.

Composition for 10gr (= 3 single dose packets): Magnesium oxide: 365mg – Potassium citrate: 1200mg – Zinc sulfate: 44mg – Sodium molybdate: 0.025gr – calcium citrate: 1200gr – manganese sulphate: 44mg – Juniperus communis: 250mg – Betula pendula (leaf) – Roth: 250mg – Vit A(beta carotene): 16mg – Vit B₅ (Calcium D-pantothenate): 6.52mg – Vit B₆ (pyridoxine chlorhydrate): 1.7 mg – Vit B₉ (biotine): 50µg – Vit B₉ (pteroilmono-glutaminic acid): 200µg – Sodium selenate: 130µg – Vitamin D (cholecalciferol): 5µg – Natural Vit E (alfa tocopherol acetate): 36mg – Alpha lipoic acid: 100 mg – L-Glutamine: 600mg – Glycine: 300mg – N-acétylcystein: 200mg – MSM: 80mg – reduced L-glutathion: 100mg – Co-Q10: 80mg – L-carnitine tartrate: 500mg – Taurine: 200mg – Stevia rabaudosio: 0.03gr – Maltodextrine: 3.1gr – Natural lemon flavour: 1g – Dioxyde silice: 0.06g
