Ref : 1024

NUT/PL 788/19

Presentation :
Box of 120 pills

Directions :
1 to 4 pills per day

Do not use :
No known cases

GREEN TEA MINTS is a chewable tablet (or to suck) composed of green tea, barley (rich in chlorophyll) and peppermint leaf. This association makes of GREEN TEA MINTS a precious ally of oral hygiene contributing to purifying the breath to a better control of plaque.

Green tea leaf, entering in the composition of Green Tea Mints, proceed from organic farming, no synthetic fertilizer, no pesticides, no herbicides, and are harvested at the end of the summer, or the beginning of fall, when the levels of catechins are optimal.

Eating green tea is more interesting than drinking it.

More than 70% of green tea nutrients, the carotene, the vitamin E, the chlorophyll and the fibres are insoluble in water. By drinking green tea the traditional way, lots of nutrients are lost. Eating complete green tea has many advantages and seems more judicious.

Main active materials of green tea

Besides, the caffeine and the vitamins (B₁, B₂, B₃ and C), the minerals (iron, selenium) the green tea is a source of polyphenols, the most important being the epicatechin (EC), the epicatechin gallate (ECG), the epigallo catechin (EGC), and the epigallocatechin gallate (EGCG)

The chewing of the GREEN TEA MINTS tablets contributes to the sanitation of the mouth, the breath, and to a fresh breathing.

For a maximal effect, the Green Tea Mints tablet must not be swallowed directly, but are to be left to melt in the mouth or shewed a few minutes.

Composition for 1 pill: Sinensis Camellia (green tea): 100mg – vulgare hordeum (barley): 33.5mg

Non active ingredients: Sorbitol, oligosaccharides, dextrose, sillicium dioxide, peppermint
